## 2011-2012 Section/Class Size Update

The attached spreadsheet shows an update of the class sizes and number of sections that we are anticipating for the upcoming school year. The top chart reflects the current enrollment numbers, and the bottom chart reflects the numbers that we used to predict the enrollment from last summer.

There is also an additional column added to show the variance in class sizes between the two schools. The negative numbers do not carry any significance. Some numbers are negative because of the type of math formula used in excel.
